

TASKI INTELLIBOT

## Hospital Client Profile

**Industry:** Healthcare

**Facility:** Major, top-ranked children's hospital

- » More than 500 beds
- » 40% dedicated to neonatal and other intensive care units (ICUs)
- » Adjacent to a major state university medical school
- » 28,000 annual admissions
- » More than one million outpatient visits annually
- » More than 500,000 sq. ft. (46,452 sq. m.) of flooring

**TASKI Intellibot Equipment:** SWINGOBOT 1650<sup>®</sup> Hands-Free Scrubber-Drier

- » Installed March 2012
- » Fitted with filtration system designed specifically for healthcare facilities
- » Purchased auxiliary battery exchange kit to double-shift operation
- » Deployed in Research Department and other areas
- » **Operations:** 3rd shift for 6 hours
- » **Primary Assignment:** Corridors and hallways
- » **Method:** Hands-Free Area cleaning and Mapped cleaning

**Benefits:**

- » **Hands-Free Cleaning<sup>®</sup> operation:** allows operator to focus on high-priority tasks such as high-touch area cleaning and disinfection
- » **Uses 85% less water and chemicals** than traditional floor-cleaning machines  
*(saving the hospital more than 20,000 gal., or 75,708 l, of water per year)*
- » **Ultraviolet light use results in 99.9% removal of viruses and bacteria** in water that goes on the floor
