

# INTELLI-TRAK™ Fleet Management

REAL-TIME CONTROL & DATA MEAN  
REAL-TIME EFFICIENCY

- 1 Accountability**  
Managing is easier with 24/7 wireless reports showing operator identification, date of use, start time, machine location(s), cleaning time, and any performance issues.
- 2 Remote Assistance**  
System diagnostics ID problems and instantly alert service; technicians can remotely resolve most issues without a service call.
- 3 Reduced Downtime**  
24/7 reporting from each unit allows for easier management, lower service costs, faster service response, and reduced downtime.
