Sealed Air acquires assets from Intellibot Robotics

Zurich, Switzerland – April 15, 2015 - Sealed Air (NYSE: SEE) today announced the acquisition of certain assets of Intellibot Robotics LLC, a US-based privately owned company that has pioneered the development of commercial floor cleaning robots.

The acquisition includes certain intellectual property, the manufacturing operations in Virginia as well as sales, production and engineering staff. The business will be integrated into Sealed Air's Diversey Care division and its leading brand of TASKI floor cleaning machines.

The demand for automated cleaning machines is growing rapidly in the world's developed countries due to significant advances in technology, labour shortages and the need for higher productivity in daily cleaning tasks.

Intellibot's value proposition is based on "hands-free cleaning" robots which improve the economics of cleaning by reducing labour costs and increasing productivity.

Dr. Ilham Kadri, Diversey Care President, said: "This is another example of how Sealed Air is changing the game and it positions Diversey Care as the first hygiene and cleaning player to enter the industrial robotics arena. Our industry expertise, global reach, design and manufacturing capabilities combined with Intellibot's groundbreaking artificial intelligence technology will help accelerate

the development of the robotic floor cleaning machines market – ultimately driving efficiencies and business value for our industry."

Financial terms of the transaction were not disclosed. Sealed Air does not expect the transaction to be material to its consolidated financial position or results of operation.

Diversey Care is a division of Sealed Air Corp., a leader in food safety and security, facility hygiene and product protection. For more information about Diversey Care, please visit <http://www.sealedair.com/company/diversey-care> or follow us on LinkedIn, Facebook and Twitter.
