

Built-in safety and reliability

Safe. Autonomous. Welcome to the future of floor care.

At Intellibot, we understand that safety in the workplace is a top priority. All of our products provide an array of built-in safety features to protect your customers and your employees. The result is safe, reliable floor-cleaning solutions for every environment.

■ Operator-free Operation

360-degree sensors allow Intellibot to strategically avoid obstacles whether stationary or in motion.

■ Advanced Sensor and Sonar Technology

Using a network of 14 sensors, the robot easily navigates around obstacles and stops to let people pass.

■ Obstacle Avoidance

The robot detects and memorizes fixed obstacles, such as fire extinguishers and water fountains.

■ Floor and Surface Sensors

It notes and records staircases and all other surface changes.

■ Emergency Stop Buttons

Intellibot can be stopped immediately, safeguarding people and equipment.

■ Motion Detectors

Intellibot immediately stops and lets people pass at a safe distance before resuming its operation.

■ Remote Diagnostics and Reporting

The robot automatically alerts its operator whenever it needs assistance.

■ Turn and Stop Indicators

Much like a car, front and rear lights signal the Intellibot's intentions to turn or stop.

By switching to Intellibot, you can ensure that your facility is cleaned safely and consistently - every time.

To learn more about how Intellibot can help keep your business cleaner, please visit our website www.intellibotrobotics.com

Intellibot offers three floor-cleaning robots featuring G10 technology, intelligence mapping, eco-friendly water reclamation, and superior surface cleaning. No other floor cleaning option provides all of these benefits.
